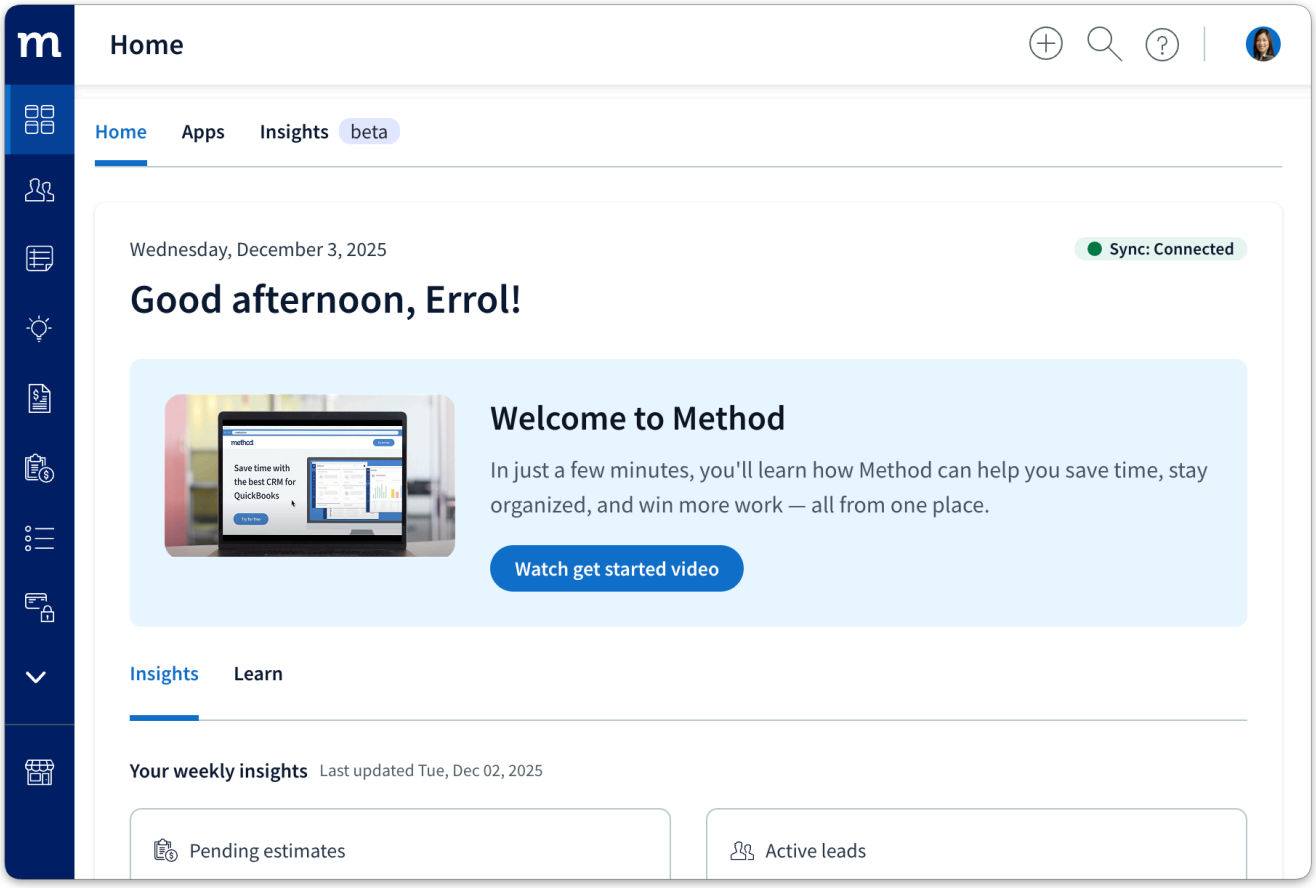
# A First Look at Method

Description of Home page tab functions available to Admins on login.

Updated over a month ago

Table of contents



# 🏠 Home Screen Overview

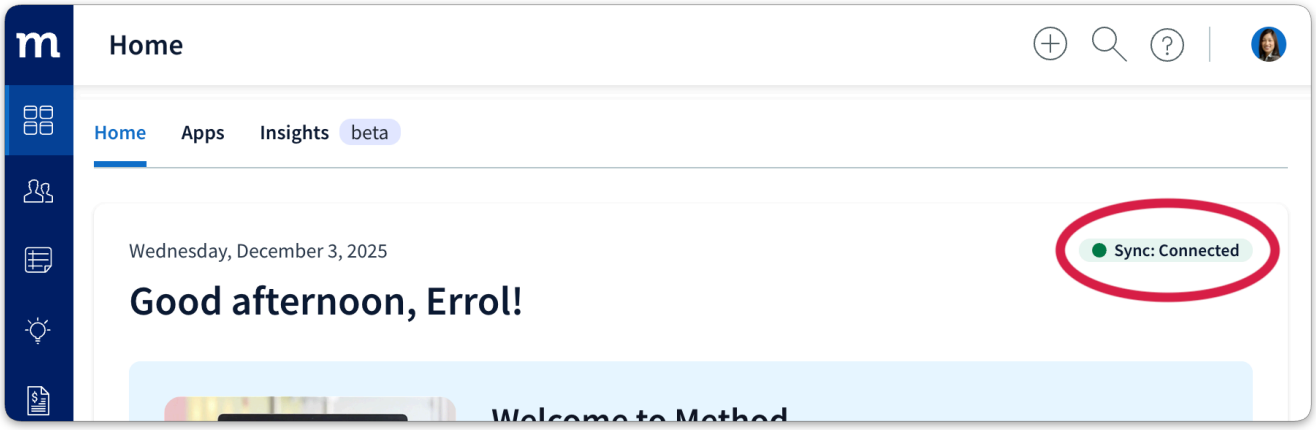
The Home screen provides a personalized overview of your day in Method — helping you stay on top of your upcoming activities, Method education, and business insights.

From one place, you can:

- See your upcoming activities.
- Explore guided tours.
- View helpful insights.
- Quickly create new records in your apps.

## 🔄 Sync Status (Admins only)

In the *Welcome* section of the Home screen, you will see a sync status. Hovering over the status will show connection details.

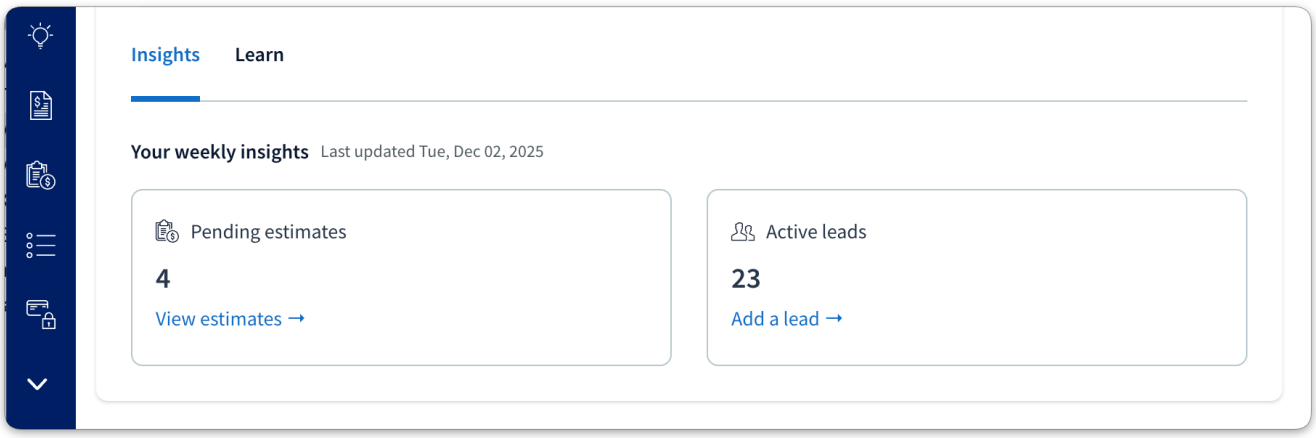


- **Sync: Connected** - Your Method account is connected to your accounting software. Everything is syncing normally.
- **Sync: Disconnected** - click the pill to open your **Integrations > Sync** page and reconnect.

For more information, see our article Sync Status.

📌 ***Note:*** Regular users will not see this element.

## 📊 Insights Tab



### What it does:

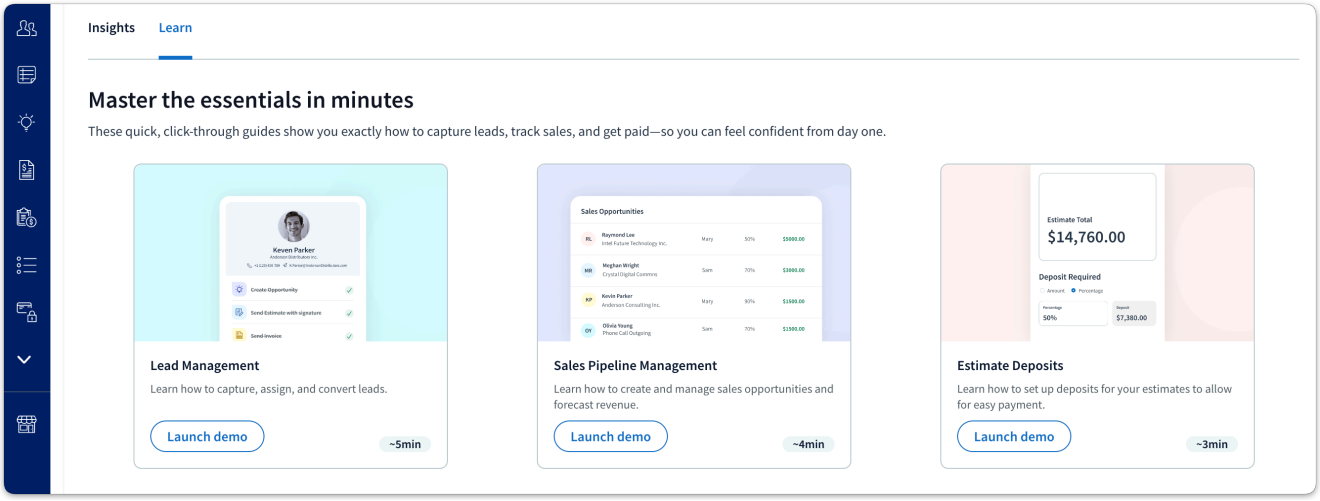
Displays visual insights about your account — such as pending estimate value, active leads, or customer engagement — with quick links to take action.

### How to use:

- Open the **Insights** tab (it's selected by default).
- Each block shows a key metric or insight (for example, "Pending Estimate Value" or "Active Leads").
- Click the **blue CTA link** to jump directly to the relevant app or filtered view.
- Insights update automatically each week.

📌 ***Note:*** Insights shown vary based on your role and permissions.

## 🎓 Learn Tab



## What it does:

Provides step-by-step product tours to help you get familiar with key Method apps and workflows.

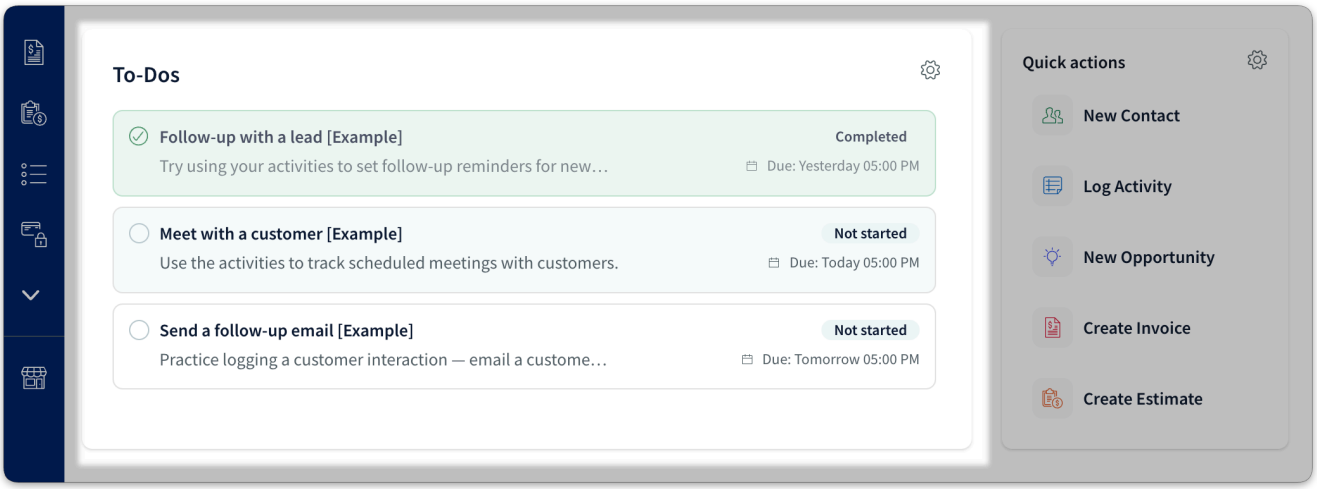
## How to use:

- Click the **Learn** tab to view available tours.
- Each card includes a short description and estimated completion time.
- Click **Launch Tour** to open an interactive walkthrough.

Completed tours will show a checkmark ✅ once you've finished them.

> 📌 ***Note:*** On mobile, the Learn section is hidden to simplify the layout.

## ✅ To-Do List (Activities)



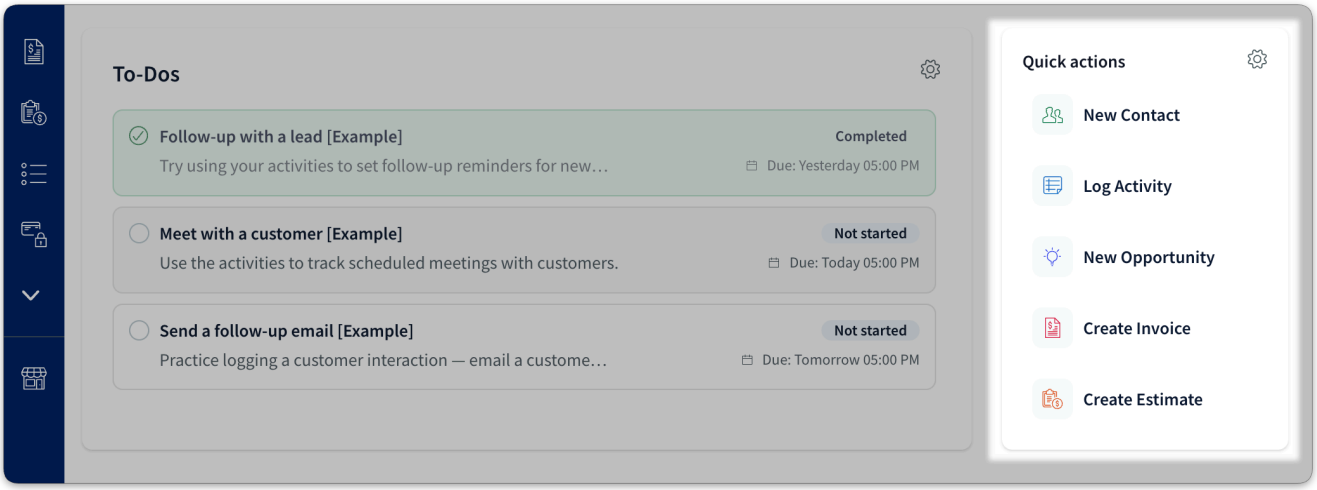
### What it does:

Shows a summary of your assigned activities and upcoming tasks.

### How to use:

- The **To-Do** section lists **activities** assigned to you, ordered by due date.
- Check off tasks as you complete them to update their status instantly.
- Use the configuration icon ⚙️ to adjust your view — for example, show only this week's activities OR show my completed tasks (up to 7 days back)
- Click any activity to open a quick-view modal with details and options to mark complete or open the full record.
- When your list is empty, you'll see: *"Well done! You're all caught up."*

## ⚡ Quick Actions (Shortcuts)



### What it does:

Lets you quickly create new records (like contacts, invoices, or leads) without navigating through multiple screens.

### How to use:

- Find this section labeled **"Quick Actions"** on the right side of your Home screen.
- Click a shortcut button (e.g., "New Contact," "Create Invoice") to go straight to that app's *Create New* page.
- Click the ⚙️ icon to customize which shortcuts appear — you can choose up to five actions.

- Your shortcuts update instantly after saving.
- If no shortcuts are available, you'll see: *"Nothing here yet! Quick actions will appear with app 'Create' permissions."*
