## Method Multi Currency Messaging and Positioning (+UK)

### Launch Context

This document translates the new multi currency functionality into clear market facing value. It aligns product, marketing, sales, and paid acquisition around a single story that feels grounded in how QuickBooks based businesses actually operate.

This is a catch up release that removes visible friction prospects have already noticed. It also unlocks stronger credibility in global and cross border use cases, especially in the UK, EU, and multi region service businesses.

---

### The Core Problem We Are Solving

| Signal | What We Observed |
|---|---|
| Demo objections | Prospects called out invoices showing GBP 100 or generic symbols as unprofessional |
| Compliance gaps | No native place to store VAT registration numbers in Method |
| Competitive trust gap | Method perceived as behind QuickBooks and Xero on basics |

This was not about accounting accuracy. It was about first impressions, trust and credibility.

---

### Positioning Statement

Method now handles multi currency the way your customers expect, automatically.

Invoices show the right local currency symbol and VAT information without manual setup, so your documents look legitimate, professional, and compliant everywhere you do business.

---

### One Liner

Invoices, estimates and emails that look local, without extra work.

---

**Message Pillars**

| Pillar | Customer Pain | Method Update | Why It Matters | Source |
|---|---|---|---|---|
| Look professional | Generic currency codes look fake | Auto currency symbols | Invoices feel local and legitimate | [Launch Brief] |
| Stay compliant | VAT number missing from invoices | VAT Reg Number sync | Reduces compliance risk | [Launch Brief] [UK Market Analysis] |
| No manual setup | Teams forget settings | Automatic switching *(once manually set)* | Less errors, less friction | [Launch Brief] |

---

**Who This Matters Most For**

- UK based QuickBooks users issuing invoices to EU or international customers
- Service businesses billing across borders
- Multi entity or multi location businesses standardizing invoice quality
- Any team competing against QuickBooks or Xero native experiences

This is especially relevant for first time CRM buyers who already trust QuickBooks as their financial source of truth.

---

**Competitive Framing**

**UK Competitive Analysis Chart**

| Product | QuickBooks Focus vs Method | Integration Style | Notable UK Angle | Why Method Wins | Source |
|---|---|---|---|---|---|
| Method | Native, QuickBooks first | Patented two way real time sync across QBO and QBDT | Built specifically to extend QuickBooks workflows | Deepest sync, automation, portals, customization without dev work | [Product Deck] [Battlecards] |

| | | | | | |
|---|---|---|---|---|---|
| Capsule CRM | Light QuickBooks support | Native QBO app, largely one way | Simple UK CRM with free tier | Real bidirectional sync, no contact limits at mid tier, workflow automation | [Competitive Analysis] |
| Pipedrive | Sales only QB touchpoints | Marketplace apps or Zapier | Deal focused pipeline | Full invoice, payment, estimate sync plus client portals | [Battlecards] |
| Zoho CRM | Platform level add on | Native QBO extension, bidirectional | All in one suite appeal | Stronger QB focus, fewer paid add ons, no code workflows | [Battlecards] |
| Insightly | Connector based | App based QuickBooks sync | CRM plus projects | Real time sync and customization without developer overhead | [Competitive Analysis] |

---

**UK Paid Search Competitor Keyword Mapping**

| Competitor | Common UK Search Intent | Typical Competitor Angle | Method Counter Message | Source |
|---|---|---|---|---|
| QuickBooks | QuickBooks VAT invoice | Compliance built in | Extend QuickBooks with CRM without breaking compliance | [UK Market Analysis] |
| Xero | Xero CRM UK | Modern accounting plus apps | Match accounting polish, add real workflows | [Competitive Analysis] |
| Capsule CRM | Simple CRM UK | Easy setup, low cost | Go beyond contacts with real QuickBooks workflows | [Sales Feedback] |
| Pipedrive | Sales CRM QuickBooks | Deal tracking first | Manage deals and invoices together in QuickBooks | [Battlecards] |
| Zoho CRM | All in one CRM UK | Everything in one platform | QuickBooks first, not a general suite | [Competitive Analysis] |

| Product | QuickBooks Focus vs Method | Integration Style | Notable UK Angle | Why Method Wins | Source |
|---|---|---|---|---|---|
| **Method** | Native, QuickBooks first | Patented two way real time sync across QBO and QBD | Built specifically to extend QuickBooks workflows | Deepest sync, automation, portals, customization without dev work | [Product Deck] [Battlecards] |
| **Capsule CRM** | Light QuickBooks support | Native QBO app, largely one way | Simple UK CRM with free tier | Real bidirectional sync, no contact limits at mid tier, workflow automation | [Competitive Analysis] |
| **Pipedrive** | Sales only QB touchpoints | Marketplace apps or Zapier | Deal focused pipeline | Full invoice, payment, estimate sync plus client portals | [Battlecards] |
| **Zoho CRM** | Platform level add on | Native QBO extension, bidirectional | All in one suite appeal | Stronger QuickBooks focus, fewer paid add ons, no code workflows | [Battlecards] |
| **Insightly** | Connector based | App based QuickBooks sync | CRM plus projects | Real time sync and customization without developer overhead | [Competitive Analysis] |

This table reflects how UK buyers typically evaluate tools in paid and demo driven journeys. The main risk competitors introduce is surface level QuickBooks support that looks sufficient until invoice and accounting workflows break.

**UK Market Accounting vs CRM Framing**

| Platform Type | What They Do Well | Where They Fall Short | Method Position | Source |
|---|---|---|---|---|
| QuickBooks | VAT and currency handled | Limited workflows outside accounting | Extend QuickBooks without hacks or workarounds | [UK Market Analysis] |
| Xero | Strong UK compliance | Shallow CRM and sales workflows | Match accounting polish, then go deeper | [Competitive Analysis] |
| Generic CRMs | Sales and pipeline tooling | Weak or shallow QuickBooks sync | QuickBooks first by design | [Battlecards] |

This release removes a parity gap so Method can win on customization and workflows.

---

**Sales Enablement Talk Track**

If a prospect raises multi currency concerns

*“Yes, we handle that now. Your invoices automatically show the correct currency symbol and VAT number based on the customer, without your team changing settings every time. It is one of those details that customers notice immediately.”*

If comparing to QuickBooks or Xero

*“They handle accounting well. Method now matches them on invoice presentation, but also gives you control over everything around it, from sales to service to follow ups.”*

---

**Paid Ads and Google Search Messaging**

**UK Market Competitive Snapshot**

| Area | What We See in Market | Opportunity for Method | Source |
|---|---|---|---|
| Search ads | Heavy VAT and compliance language | Call out invoice credibility | [UK Market Analysis] |
| CRM ads | Generic productivity claims | Fix a visible problem | [Marketing Data] |
| Buyer mindset | Trust first, workflows second | Lead with legitimacy | [Sales Feedback] |

**UK Paid Messaging Grid**

| Element | Direction | Example |
|---|---|---|
| Core angle | Invoice credibility | Make your invoices look right in the UK |
| Headlines | Direct, specific | Invoices That Look Right in the UK |
| Descriptions | Problem focused | No awkward GBP codes. Just invoices customers trust |
| CTA | QB anchored | See How It Works With QuickBooks UK |

---

**Competitor Comparison**

| **Product** | **QuickBooks focus vs Method** | **Integration style** | **Notable angle** | **Why Method wins** |
|---|---|---|---|---|
| **Method** | Native, deepest sync | Patented two-way real-time (all QB versions) | QuickBooks-first CRM + portals | Built for QB workflows; superior sync depth/customization |
| **Capsule CRM** | Basic QB connector | Native QuickBooks Online app | Simple UK CRM for SMBs | Deeper bidirectional QB sync + automation; no contact limits at mid-tier |

| | | | | |
|---|---|---|---|---|
| | | (one-way heavy) | | |
| **Pipedrive** | Sales-pipeline QB sync | Marketplace app/Zapier | Deal-focused sales CRM | Full QB integration (invoices/payments/estimates); client portals missing in Pipedrive |
| **Zoho CRM** | Platform-level add-on | Native QB Online extension, bidirectional | All-in-one suite | Tighter QB focus (no extra fees), infinite no-code fields/workflows |
| **Insightly** | Connector-based | QuickBooks sync via app | Project + relationship CRM | Real-time QB two-way + customization without dev work |

**Pricing Comparison (Updated w/ UK Competitors)**

| **Product** | **Starting Price (per user/mo)** | **Mid-Tier Price** | **Top-Tier Price** | **Billing Notes & Free Tier** |
|---|---|---|---|---|
| **Method** | $27 (Quick Start) | $45 (Pro) | $73 (Enterprise) | USD; 14-day trial; 25% off first 3 mo |
| **Capsule CRM** | £0 (Free, 2 users) | £15 (Professional) | £30 (Teams) | GBP; generous free tier, annual discounts |
| **Pipedrive** | ~$14 | ~$49 | ~$99 | USD; sales-focused; 14-day trial |
| **Zoho CRM** | Free | ~$20-40 | ~$50+ | USD/GBP; strong free tier |

| | | | | |
|---|---|---|---|---|
| **Insightly** | ~$29 | ~$49 | Custom | USD; project features; trial |

**Internal Guidance**

Do not oversell this as advanced FX or accounting logic. This is about professionalism, trust, and removing friction customers have already noticed.

Anchor the message in how it feels to receive the invoice, not how the feature works technically.
