Prototype Testing Feedback:

Tester: Ashur

Information I called out from watching recording:

Items:
- Clarify what does “quantity” and “price” mean in grid
    - Quantity on hand and Quantity on Purchase Order
- Inventory level colour indication
- Can’t put negative or decimals in inventory warehouse field
- Likes warehouse tracking feature but thinks we should force warehouse as a mandatory field
- Item audit log to track changes in inventory

Other screens:
- What does sync pending mean in modal?
- Trouble with adding items with “+”
- Trouble with adding quantity
- Need to ability to backorder items

Purchase Order
- Bill of sale is a confirmed purchase, purchase orders are a request to purchase
- Purchase order history/reports

What were the biggest challenges or frustrations you encountered while using both prototypes?

No clear instructions or workflow. For example, you need to setup reorder points in order for the Low Stock feature to work. Additionally the real-time qty updates on the Invoice weren't fully working unless I'm missing something. Regardless, it was difficult to work through.

What improvements or additional features would you suggest to enhance the user experience for both prototypes?

Quantity On Hand vs Quantity on Purchase Order / on Sales Order. Then make sure the foundational pieces are required so that ALL of the functionality works for all items 100% of the time.

Based on your experience with each prototype, which solution would you prefer for our inventory management solution?

Native forces users to just focus on Method. What's the point of migrating to a different software for all your business needs if you're going to keep the inventory separate. Also, I don't know how to answer the previous radio button questions because I don't know what "refined" means. It's a relative term that shouldn't be left up to interpretation. I know you're going to implement changes as you see fit, not as I see fit.

How easy was it to navigate the **Hybrid Prototype**? *

	1	2	3	4	5	
Very Difficult	◉	○	○	○	○	Very Easy

How easy was it to navigate the **Native Prototype**? *

	1	2	3	4	5	
Very Difficult	◉	○	○	○	○	Very Easy

To what extent do you agree with the following statements for the **Hybrid Prototype**? *

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
The prototype's design reflects my expectations for an effective inventory management solution.	◉	○	○	○	○
The layout and organization of features supports our customers workflow.	○	◉	○	○	○
The integration points (e.g., syncing with external systems) are clearly communicated in the interface.	○	◉	○	○	○

To what extent do you agree with the following statements for the **Native Prototype**?

	Strongly Disagree	Disagree	Neutral	Agree	Strongly Agree
The prototype's design reflects my expectations for an effective inventory management solution.	◉	○	○	○	○
The layout and organization of features supports our customers workflow.	○	◉	○	○	○

Which of the following features did you find the most valuable? (Choose a maximum of 4) *

- [x] Real-Time Inventory Visibility
- [ ] Third-Party Integration
- [x] Multi-Warehouse Management
- [ ] Detailed Location Based Tracking (lots, bins, zones, aisles, etc)
- [ ] Serial Number Tracking
- [ ] Dynamically Insert, Rearrange, and Edit line Items
- [ ] Reorder Points & Low Stock Alerts
- [x] Purchase Order Automation
- [x] Inventory Reports
- [ ] Other: _____

How important is each feature for our customers daily operations? *

	Not Important	Slightly Important	Moderatly Important	Important	Extremely Important
Real-Time Inventory Visibility	○	○	○	○	◉
Third-Party Integration	○	◉	○	○	○
Multi-Warehouse Management	○	○	○	○	◉
Detailed Location Based Tracking (lots, bins, zones, aisles, etc)	○	○	○	○	◉
Serial Number Tracking	○	○	○	○	◉
Dynamically Insert, Rearrange, and Edit line Items	○	○	○	○	◉
Reorder Points & Low Stock Alerts	○	○	○	◉	○
Purchase Order Automation	○	○	○	○	◉
Inventory Reports	○	○	○	○	◉

How likely are you to recommend our **Hybrid Prototype** solution (if refined) to a client? *

	1	2	3	4	5	6	7	8	9	10	
Not at all likely	◉	○	○	○	○	○	○	○	○	○	Extremely likely

How likely are you to recommend our **Native Prototype** solution (if refined) to a client? *

	1	2	3	4	5	6	7	8	9	10	
Not at all likely	◉	○	○	○	○	○	○	○	○	○	Extremely likely

Based on your experience with each prototype, which solution would you prefer for our inventory management solution? *

- ◉ Native (In-House inventory solution)
- ○ Hybrid (Combines native inventory management features with integration capabilities)
