Investments

2026

TLDR: The purpose of this document is to make decisions on where we should focus our R&D efforts in 2026. The goal is to provide transparency and directional targets on how we could improve the business to inform the importance and priority of each investment.

Overview:

Priority	Rocks	Objective (Primary & Secondary)	Impact	Importance	Feedback Needed
1	AI App Builder	**AI Defensive & Offensive Strategy** 81% GRR (reduces friction in customization, core churn driver) 10% EBITDA (radical efficiency in services, support, delivery)	A mandatory foundation for future-proofing our platform and accelerating customization.	Must Do	None.
2	Core Product Journey	**81% GRR** 25% ARR (conversion & adoption lift) 10% EBITDA (fewer support chats/cases)	Improving daily workflows help retain customers and drive new revenue.	Must Do	Are we aligned on priority and importance?
3	Sync Reliability & QuickBooks Integration	**81% GRR** 25% ARR (conversion impact through trust signals) 10% EBITDA (support case reduction)	Strengthen trust in our core value prop and reduce customer churn.	Must Do	Do we want this investment to compete/tradeoff with Xero?
4	Drive Activation & Onboarding Success	**25% ARR** 81% GRR (activated users retain better) 10% EBITDA (better self-serve onboarding = lower service load)	Accelerate time-to-value to convert more users into engaged, long-term customers.	Must Do	Are we aligned on priority and importance?
5	Win the Manufacturing Customer	**81% GRR** 25% ARR (vertical wins, expansion in multi-license customers)	Deliver the workflows and depth required to capitalize on our best expansion opportunity.	Must Do	Are we aligned on priority and importance?
6	Multi-Entity	**25% ARR** 81% GRR (expansion in large/multi-location accounts) 10% EBITDA (fewer custom workarounds & PS projects)	Unlock advanced multi-entity operations so businesses trust Method with their growth.	Must Do	Are we aligned on priority and importance?
7	Xero	**25% ARR**	Expand our addressable market and enable new revenue expansion.	Won't Do	I've outlined the tradeoffs and effort. Is this worth doing compared to our other priorities?

2026 Overall Target Improvements - All Investments

Metrics	2025 Baseline	2026 Target Improvement	New Baseline 2026
Churn	945 Accounts	207 (22%↓) Accounts	738
Conversion (May - Sept)	16%	521 (15%↑) Accounts	31%

Downgrade	Not Applicable	Not Applicable	Not Applicable
Upgrade	$23,238	Not Applicable	Not Applicable

2026 Major Investments (Rocks)

Investment #1
AI App Builder — Redefine Customization with Artificial Intelligence.

What:
Enable anyone to build and customize Method apps using natural language. It's the foundation of Method's vision for an AI-First, no-code platform that lets every customer tailor Method to their exact business without technical barriers.

Why:
- 90%+ of support chats involve customization or debugging — 2x the next issue.
- It remains the #1 support chat issue across all verticals.
- Customization has always been Method's superpower and its biggest friction point. Customers love the flexibility, but today it requires time, skill, and service assistance.
- Removing tedious barriers and steep learning curves dramatically improving efficiency, accelerating customer activation, and deepen long-term engagement.
- Drives customization efficiencies across all users existing and new improving EBITDA.

Roadmap Initiatives:

- [Q4-2025] A 'Specification' Architect, an AI that takes App requirements and produces an implementation plan.
- [Q1] A 'Screen Builder' Architect, an AI that takes specifications and builds an app.
- [Q2] A debugging application that allows you to troubleshoot app errors.
- [Q3] A unified language for describing, creating and executing defined Workflows and Automating them.
- [Q4] An Insights agent operating on run time screens that offers recommendations.
- [Q4] An ability to build and automate actions on individual run time screens.

Metrics	2025 Baseline	2026 Target Improvement	Rational
Churn	149 Accounts	15 (10%↓) Accounts	Targeting 2 sub root causes reported by churning customers.
Conversion (May - Sept)	16.04%	85 (2.46%↑) Accounts	Targeting 2 sub reported root causes related to trial abandonment.
Downgrade	Not Applicable	Not Applicable	We don't expect any impact to preventing license downgrades.
Upgrade	$23,238	Positive ↑	Positive impact but unable to model with any degree of accuracy.
% of Accounts Customizing	8%	25%	Accelerating time-to-value and increasing product stickiness.

Investment #2:
Core Product Journey — Ensure every customer can accomplish their daily work - easily.

What:
Transform Method from a powerful-but-complex platform into an intuitive daily tool by simplifying core workflows, reducing friction in common tasks, and making the product easier to use.

Why:
Customers love what Method can do, but struggle with how hard it is to do it every day.

- High Support Burden: 17.6% of support chats (1,561) mention workflow friction, customers need help with basic tasks.
- Low escalation rate (5.6% chat→case) proves this is a UX problem, not broken functionality.
- Competitors win on simplicity: 19.1% of churned customers cite "better alternative found," often referencing easier workflows.

Roadmap Initiatives: Assume we deliver 21 items in Q1&Q2 eg 4 Items per Quarter for 3 teams -3 week sprints.

Theme 1: Wrap up Field Services and Mobile Pain Killers

- [Q1] Build a Scheduling App Template to help plan and execute work orders.
- [Q2] Enable the assignment of multiple technicians to a task.
- [Q2] Integrate portal job requests with Estimates and Workorders.
- [TBD] Improve the Creation and Tracking of Purchase Orders with visibility in Work Orders.
- [TBD] Enable usage of the mobile app while in an ‘offline’ state.

- [TBD] Enable Photo capture: Document work, capture signatures, attach to records.
- [TBD] Generate quotes & get e-signatures.

Theme 2: User Management & Team Collaboration & Search

- [Q1] Upgrade Universal Search to support fuzzy search and AI-powered intent handling.
- [Q1] New user add/invite flows currently built for Multi-Entity to single-entity accounts.
- [Q2] Give non admin users the ability to request new users to admin.
- [Q2] Prevent unauthorized sharing of license seats by enforcing strict session and seat controls at sign-in.
- [TBD] Enable users to effortlessly share specific records peer-to-peer

Theme 3: Financial Operations & Invoicing

- [Q1] Ability to do bulk invoice creation and storing multi-addresses.
- [Q1] Create credit memo’s in method.
- [Q1] Enable Invoice reminders and display late payment KPIs.
- [Q1] Enable the ability to process payments.
- [Q2] Email settings quality of life improvements.
- [Q2] Payment settings quality of life improvements.

Theme 4: Communication & Activity Management

- [Q1] Improve internal notes with attachment and UI fixes.
- [Q1] Create a new "Priority" field in the Activity table.
- [Q1] Display this value on the Activities List screen and use it in the grid's sorting criteria.
- [Q2] Deeper email integration (emails automatically get logged as activities in the system).
- [Q2] Make it easier to complete activities by adding a "Complete" option directly on the list screen(s).
- [TBD] Implement a "Notification Centre" as a platform component, listing overdue or high priority action items.

Theme 5: Data Visibility, Insights & Quick Actions

- [Q1] Improve Audit Trail functionality and user interface.
- [Q1] Display an "insights" section on Customer/Contact records, providing observations & valuable next steps.
- [Q1] Implement a Kanban board and leverage it in the opportunities app.
- [Q2] Make accessing attachments easier by improving renaming,visibility and viewing in apps.
- [Q2] Implement "quick add" screens in modal form for contacts and activities.
- [TBD] Ability to review estimates vs work order and do light job costing.

- [TBD] Create the ability to report on Jobs by showing costs, profits, completion and on time rates.

Theme 6: Portal & Platform Improvements

- [Q1] Portal quality of life improvements.
- [TBD] Allow customers to log job requests from the portal.
- [TBD] Improve App Routines visibility and management of revisions.
- [TBD] Provide more button configuration options to app developers for Show Message modals.
- [TBD] Leverage new Show Message button options to provide clearer messaging flows in the stock apps.
- [TBD] Capture signatures on invoices in the portal.

Metrics	**2025 Baseline**	**2026 Target Improvement**	**Rational**
Churn	293 Accounts	44 (15%↓) Accounts	Targeting 4 sub root causes reported by churning customers.
Conversion (May - Sept)	16.04%	135 (3.86%↑) Accounts	Targeting 3 sub root causes reported by trial abandonment.
Downgrade	Not Applicable	Not Applicable	We don't expect this to affect license downgrades.
Upgrade	$23,238	Positive ↑	We expect a positive impact, but current data does not allow for reliable forecasting.
WK4 Retention Core Apps	85%	5%↑	Improving the utility of the core 5 apps.
Reduce Support Cases	3900	195 (5%↓) Cases	Reduce the support burden to drive retention.
CRM Daily Tasks	19%	25% (6%↑) WAU	Improve the utility of core CRM tasks to drive retention.

Investment #3:
Strengthen the Foundation — Sync Reliability & QuickBooks Integration.

What:
Deliver Sync customers can trust and integrations that go deeper with QuickBooks—expanding what Method can do out of the box.

Why:
Sync reliability isn't a feature—it's existential. Every sync failure is a trust failure.

- Sync reliability is our primary support driver, accounting for over one-third of all customer contacts — 34% of support cases (1,064) and 33.6% of chats (3,003).
- Sync reliability is also our most controllable churn factor, cited in 8.4% of all customer exits (105 mentions).

- New QuickBooks capabilities — including Sales Tax Calculation, Project Management, and Dimensions APIs — unlock critical workflows for our largest customers and top four verticals.
- Sync-related requests rank among the top feature requests reported by our Sales and Professional Services teams — a strong signal of customer demand and operational impact

Roadmap Initiatives:

Sync Reliability

- [Q1] Implement real time status updates on the record with signalR implementation.
- [Q2] Build one click resolutions as part of the sync widget experience.
- [Q3] Build enhancements to click through workflows required to resolve sync conflicts.
- [Q4] Improve Google calendar v4 system pages by showing connection status and error messages.

QB Integration

- [Q1] Syncing support for QBO Dimensions API.
- [Q2] Syncing support for QBO Credit Memos applied to Transactions.
- [Q3] Syncing support for QBO Refund Receipts.
- [Q4] Syncing with QBO Sales Tax API to enable Tax support.
- [Q3] Syncing with QBO Projects API to enable project management workflows.

Metrics	**2025 Baseline**	**2026 Target Improvement**	**Rational**
Churn (4 Reasons)	77 Accounts	23 (30%↓) Accounts	Targeting 4 sub root causes reported by churning customers.
Conversion (May - Sept)	16.04%	49 (1.46%↑) Accounts	Targeting 2 sub root causes reported by trial abandonment.
Downgrade	Not Applicable	Not Applicable	We don’t expect this to affect license downgrades.
Upgrade	$23,238	Not Applicable	We don’t expect this to affect license expansions.
Reduce Support Cases	3900	380 (10%↓) Cases	Reduce the support burden to drive retention.

Investment #4:
Ignite Activation — Drive Activation & Onboarding Success.

What:

Help more prospects experience Method's value faster by removing friction in the first mile — improving trial onboarding, simplifying setup, and ensuring customers reach "aha" before they give up.

Why:
Method's biggest problem isn't keeping customers — it's getting them activated in the first place.

- Trial conversion is 16.79%, below the 40–60% industry benchmark.
- 88% of users never subscribed, meaning they never truly experienced Method's value.
- Product complexity or unclear value drives roughly one-third of all trial abandonment (≈35%), making it the dominant barrier to activation.

Roadmap Initiatives:

- [Q1] New 'Home' to help users discover and use core uses eg create contact, begin estimate etc.
- [Q1] Drive the 3-5 most important initial setup activities.
- [Q1] Providing insights (email and in product) via sync that allow users to navigate to key apps/use cases.
- [Q1] Drive demos, free hours and create a marketing/sales section to drive customers to key retention actions.
- [Q1] Explaining 'how to use' content in the form of videos and tips.
- [Q2] Recommended AI Insights tasks to drive product usage.
- [Q2] Test changes to signup, onboarding, trials and subscription flows.
- [Q3] Drive DEP inquiries by promoting customization on the homescreen.

Metric	**2025 Baseline**	**2026 Target Improvement**	**Rational**
Churn	337 Accounts	100 (30%↓) Accounts	Targeting 4 sub root causes reported by churning customers.
Conversion (May - Sept)	16.04%	190 (5.56%↑) Accounts	Targeting 3 sub root causes reported by trial abandonment.
Downgrade	Not Applicable	Not Applicable	We don't expect this to affect license downgrades.
Upgrade	$23,238	Not Applicable	We don't expect this to affect license expansions.
3KV Actions in 7D	0%	90%	Completing 3 key value actions in 7 days drives retention.

Investment #5:
Win the Manufacturing customer — turn accounts and users into enduring fans.

What:
Deepen product-market fit in Method's fastest-growing and most durable customer segment — with tools tailored to the workflows of manufacturing, warehouse, and distribution teams. Turn strong-fit accounts into loyal fans and multi-license growth engines.

Why:
Manufacturing, Warehouse & Distribution (MWD) customers are already where Method wins — and where we're poised to win more.

- MWD was our fastest-growing industry over the past 18 months, accounting for 19.85% of all new accounts.
- These customers also show the lowest churn rate — 23% in 2026, indicating strong long-term value.
- Across 365 active accounts, 10.1% (37) are already large (10+ licenses), meaning 87% of the base has room to expand.
- Manufacturing is #1 by total users.

Roadmap Initiatives:

- [Q1] Enable users to create, update and manage multiple inventory locations.
- [Q1] Enable users to Add/Edit inventory counts for Quantity On Hand across apps.
- [Q2] Allow users to do basic inventory adjustments at the 'Bin' level.
- [Q2] Allow users to transfer stock between locations.
- [Q2] Enable users to set 're-order' points and set up 'low stock' alerts.
- [Q3] Build 'Back Order' awareness but overriding inventory limitations and enabling new inventory types.
- [Q3] Integrate Katana & Method to enable a hybrid inventory solution.
- [Q4] Provide the ability to capture and upload photos for items.
- [Q4] Enable drag and drop item management in all transactions
- [Q4] Improve the Item Audit Trail to show a comprehensive view of all changes.

Metric	**2025 Baseline**	**2026 Target Improvement**	**Rational**
Churn	144 Accounts	14 (10%↓) Accounts	Targeting 3 sub root causes reported by churning customers.
Conversion (May - Sept)	16.04%	58 (1.66%↑) Accounts	Targeting 1 sub root causes reported by trial abandonment.
Downgrade	Not Applicable	Not Applicable	We don't expect this to affect license downgrades.
Upgrade	$23,238	Not Applicable	We don't expect this to affect license expansions.

Vertical Solutions Adoption	0%	20%	Grow manufacturing adoption of vertical solutions to drive retention.

Investment #6:
Multi-Entity — Deliver the powerful Multi-Entity Experience in the Intuit Ecosystem.

What:
Empower customers to manage multiple entities, locations, currencies or brands effortlessly — with clear data separation, unified reporting, and seamless QuickBooks integration — transforming fragmented workflows into a single scalable system that grows with their business.

Why:
Delivering a lovable Multi-Entity experience will position Method as the Intuit ecosystem's only CRM that scales seamlessly across entities, unlocking retention and expansion within our most valuable customer tiers.

- Large accounts (230) represent our highest value segment and are multi-entity by nature: Manufacturing businesses with separate warehouses, Field Services with 3+ locations, Construction firms running multiple projects/entities and franchises.
- Prevents "workaround churn" because when customers outgrow Method when they can't manage multiple entities cleanly — forcing them to seek competitors and leave.
- Solving multi-entity prevents churn in our best customers and unlocks expansion in accounts already proven to scale.

Roadmap Initiatives:

- *[Q1] Enable bulk editing of and adding users to entities, directly from the users tab.*
- *[Q1] Simplified app-pack and permission configuration in the bulk invitation and edit flows.*
- *[Q1] App Permissions & Management Bulk Actions.*
- *[Q2] Extend multi-entity capabilities to runtime screens enabling seamless access and syncing.*
- *[Q3] Provide super-admins with reporting capabilities to monitor entities, user provisioning, and key metrics.*
- *[Q3] Provide a global Preferences panel for Super-Admins to configure branding, templates, across all entities.*

OKR1: Reduce average Multi-Entity setup time from 12 to 4 weeks. *(Still validating baselines).*

OKR2: Reduce the number of steps to complete key admin and non admin workflows by ≥ 50%. *(Still validating baselines).*

***Metric SMB not ME Data**	**2025 Baseline**	**2026 Target Improvement**	**Rational**
Churn	146 Accounts	7 (5%↓) Accounts	Targeting 2 sub root causes reported by churning customers.
Conversion (May - Sept)	16.04%	Not Applicable	We lack trial data on users seeking Multi Entity. We do believe this will positively impact conversion if we are able to equip sales with our latest improvements.
Downgrade	Not Applicable	Not Applicable	We don't expect this to affect license downgrades.
Upgrade	$23,238	Not Applicable	We do expect this to affect license expansions but we lack data to model this.
Setup Time *(Validating)*	12WKS	4WKS	Reducing setup time will drive retention.
Ease of Use *(Validating)*	TBD	50%	Reducing steps to complete key workflows will improve retention.

2026 Minor Investments (Pebbles)

We plan to complete and support major investments from 2025.

1. Mature the New App Builder.
2. Ensure high uptime for Method Payments & Transactions.
3. Enable customers to create and manage automations via Event-Driven Architecture UI.
4. Maintain stability across the Jobs app and overall Field Service experience.

2026 Core Health (Sand)

1. Future proof against future failures by modernizing our infrastructure - Improve deployment times and success rate.
2. Improve System Reliability - Raise baseline on uptime and error rates.
3. Improve Uptime & Bug SLAs - shift to customer days to fix & give P3's an SLA.

2026 What we are saying No To (Noise)

Focus means trade-offs. These are areas we've intentionally paused or deprioritized to stay focused on impact, not activity.

1. Heavy investment in low-scale verticals (e.g., Accounting, Consulting) that don’t support our growth thesis.
2. Equal treatment of all verticals — we’re doubling down where we win most.
3. Xero Expansion — paused until UK QuickBooks and Multi-Entity customers are happy.
4. Pause Field Services ICP after we plug the major experience gaps. Focus on Manufacturing/Operators/SDRs.
5. Localization beyond multi-currency — out of scope for 2026.
6. Broad CRM features work not serving SDRs or Manufacturing personas.
7. Building features that don’t address churn or expansion — every initiative must tie to retention or revenue.
8. Scaling Multi-Entity before fixing core foundations — quality first, scale second.
9. Treating churn as “normal.” We’re fixing the leaky bucket, not accepting it.

Appendix

Impact Framework

TLDR: This is the approach I took to size the impact, I am not trying to achieve precision (it would be false) but rather directional accuracy.

2026 Overall Target Improvements - All Investments

Metric	2025 Baseline	2026 Target Improvement
Churn	945 Accounts	207 (22%↓) Accounts
Conversion (May - Sept)	16.04%	521 (15.1%↑) Accounts
Downgrade	Not Applicable	Not Applicable
Upgrade	$23,238	Not Applicable

Investment #1

AI App Builder — Redefine Customization with Artificial Intelligence.

Overview

Metric	2025 Baseline	2026 Target Improvement	Rational
Churn	149 Accounts	15 (10%↓) Accounts	Targeting 2 sub root causes reported by churning customers.
Conversion (May - Sept)	16.04%	85 (2.46%↑) Accounts	Targeting 2 sub reported root causes related to trial abandonment.
Downgrade	Not Applicable	Not Applicable	We don't expect any impact to preventing license downgrades.
Upgrade	$23,238	Positive ↑	Positive impact but unable to model with any degree of accuracy.

Sources

1. Churn Data
2. Rev Cogs
3. Expansion Data

A. Churn Hypothesis -10%

Root Causes Addressed:

- In 2025 146 accounts churned due to too hard to customize or difficulty with workflow issues.

    - 6.5% of paid churn is "Team Adoption Failure" - teams can't customize Method themselves.
    - 9.6% of trial abandonment is "Customization Problems" - too complex to set up.
    - 5.5% of paid churn cite "Workflow Too Complex" - can't adapt to their needs.

How AI Helps:

- Specification Architect makes requirements gathering easy (no Method expertise needed).
- Screen Builder eliminates hand-coding screens (natural language → working app).
- Debugging Application reduces support dependency (self-service troubleshooting).
- Customers who can customize stay longer.

B. New Conversions Hypothesis +2.46%

Root Causes Addressed:

- 9.6% of trial abandonment cite "Customization Problems".
- 10.0% cite "Setup Too Complex".

How AI Helps:

- Trials can build custom workflows without Method expertise.
- Specification Architect shows value fast ("tell me what you need, I'll build it").
- Screen Builder enables "wow" moments during the trial period.
- Reduces time from signup → working solution from weeks to days.

Investment #2

Core Product Journey — Ensure every customer can accomplish their daily work - easily.

Overview

Metric	**2025 Baseline**	**2026 Target Improvement**	**Rational**
Churn	293 Accounts	44 (15%↓) Accounts	Targeting 4 sub root causes reported by churning customers.
Conversion (May - Sept)	16.04%	135 (3.86%↑) Accounts	Targeting 3 sub root causes reported by trial abandonment.
Downgrade	Not Applicable	Not Applicable	We don’t expect this to affect license downgrades.

Upgrade	$23,238	Positive ↑	We expect a positive impact, but current data does not allow for reliable forecasting.

Sources

1. Churn Data
2. Rev Cogs
3. Expansion Data

A. **Churn Hypothesis -15%**

Root Causes Addressed:

- In 2025 293 accounts churned due to too hard to customize or difficulty with workflow issues.
  - "Better Alternative Found" 19.1% of paid churn where competitors win on simplicity.
  - "Workflow Too Complex" 5.5% of paid churn.
  - Team Adoption Failure 6.5% of paid churn.

How Fixing the Core Journey Helps:

- Simplified workflows reduce daily friction
- Intuitive actions make tasks faster
- Better visibility reduces decision time

B. **New Conversions Hypothesis +3.86%**

Root Causes Addressed:

- "Setup Too Complex" cited by 10.0% of users
- "Poor UX/UI" cited by 17.6%
- "Workflow Friction" cited by over+15% of support chats

How Fixing the Core Journey Helps:

- User daily task improvements simplify adoption.
- Core workflow improvements reduce daily friction.
- Veritical Workflow simplifications and quick actions improve the experience.

Investment #3

Strengthen the Foundation — Sync Reliability & QuickBooks Integration.

Overview

Metric	2025 Baseline	2026 Target Improvement	Rational
Churn (4 Reasons)	77 Accounts	23 (30%↓) Accounts	Targeting 4 sub root causes reported by churning customers.

Conversion (May - Sept)	16.04%	49 (1.46%↑) Accounts	Targeting 2 sub root causes reported by trial abandonment.
Downgrade	Not Applicable	Not Applicable	We don't expect this to affect license downgrades.
Upgrade	$23,238	Not Applicable	We don't expect this to affect license expansions.

Sources

1. Churn Data
2. Rev Cogs
3. Expansion Data

C. **Churn Hypothesis -30%**

Root Causes Addressed:

- In 2025 77 accounts churned due to Integration and Sync issues and feature requests.
  - "Sync Reliability Issues" cited in 8.4% of churn reasons all time.
  - "Missing QB Capabilities" as a part of "Better Alternative Found" seen as a subset of the main issue.
  - "Integration Failures" Within sync issues seen as a subset of integration issues.

How improving Sync and QB Integration Helps:

- Real-time status, one-click fixes, conflict workflows reduce frustration.
- Enabling Dimensions, Sales Tax, Projects close feature and integration gaps requested by customers.
- Proactive visibility reduces trust failures.

D. **New Conversions Hypothesis +1.46%**

Root Causes Addressed:

- "QB Integration Issues" mentioned in 16.9% of trial abandonment reasons.
- "Sync Reliability Concerns" are spread out among various reasons for customers having trouble.

How improving Sync and QB Integration Helps:

- New APIs unlock workflows
- Removed the embedded friction in setup to restore user confidence.

Investment #4

Ignite Activation — Drive Activation & Onboarding Success.

Overview

Metric	2025 Baseline	2026 Target Improvement	Rational
Churn	337 Accounts	100 (30%↓) Accounts	Targeting 4 sub root causes reported by churning customers.
Conversion (May - Sept)	16.04%	190 (5.56%↑) Accounts	Targeting 3 sub root causes reported by trial abandonment.
Downgrade	Not Applicable	Not Applicable	We don't expect this to affect license downgrades.
Upgrade	$23,238	Not Applicable	We don't expect this to affect license expansions.

Sources

1. Churn Data
2. Rev Cogs
3. Expansion Data

E. **Churn Hypothesis -30%**

Root Causes Addressed:

- In 2025 337 accounts churned due to users unable to get started and not finding value in Method.
  - Non-payment
  - Not using their Method Account
  - Failure to adopt, train, and engage CRM users.

How improving Activation and Onboarding Helps:

- Better activation = customers see value early = they use it.
- Simplified setup and guided onboarding reduce complexity.
- New Home experience improves UX, education reduces confusion.

F. **New Conversions Hypothesis +5.56%**

Root Causes Addressed:

- "Setup Too Complex" 10.0% noted the product was too hard to figure out.
- "Poor UX/UI" 17.6% noted the interface was not intuitive.
- "Unclear Value" 35% of trials cited a large group of users that didn't see the value in the product.
- "Product Complexity" part of the subset of 35% who cited unclear value also cited product complexity.

How improving Activation and Onboarding Helps:

- Simplified setup and guided 3-5 activities reduce complexity.
- Home discovery, sync insights, and education help users find value.
- Videos, tips, and AI Insights reduce complexity barriers.

Investment #5

Win the Manufacturing customer — turn accounts and users into enduring fans.

Overview

Metric	2025 Baseline	2026 Target Improvement	Rational
Churn	144 Accounts	14 (10%↓) Accounts	Targeting 3 sub root causes reported by churning customers.
Conversion (May - Sept)	16.04%	58 (1.66%↑) Accounts	Targeting 1 sub root causes reported by trial abandonment.
Downgrade	Not Applicable	Not Applicable	We don't expect this to affect license downgrades.
Upgrade	$23,238	Not Applicable	We don't expect this to affect license expansions.

Sources

1. Churn Data
2. Rev Cogs
3. Expansion Data

G. **Churn Hypothesis -10%**

Root Causes Addressed:

- In 2025 144 accounts churned due to users unable to get started and not finding value in Method.
  - "Feature Gaps" found in the churn reason "Better Alternative Found".
  - "Workflow Limitations" Found in Manufacturing churn data.
  - "Manufacturing-Specific" Manufacturing churn is (23%) the lowest of all verticals.

How improving the Manufacturing Vertical Helps:

- Inventory management fills critical gaps for Manufacturing customers.
- Multi-location, back orders, and inventory control enable full workflows.

H. **New Conversions Hypothesis +1.66%**

Root Causes Addressed:

- Missing Features cited as part of trial abandonment data.

How improving Activation and Onboarding Helps:

- Inventory management features attract Manufacturing trials.
- Inventory features make Method more complete for Manufacturing.

Investment 6

Multi-Entity — Deliver the powerful Multi-Entity Experience in the Intuit Ecosystem.

Overview

Metric	2025 Baseline	2026 Target Improvement	Rational
Churn	146 Accounts	7 (5%↓) Accounts	Targeting 2 sub root causes reported by churning customers.
Conversion (May - Sept)	16.04%	Not Applicable	We lack trial data on users seeking Multi Entity. We do believe this will positively impact conversion if we are able to equip sales with our latest improvements.
Downgrade	Not Applicable	Not Applicable	We don't expect this to affect license downgrades.
Upgrade	$23,238	Not Applicable	We do expect this to affect license expansions but we lack data to model this.

Sources

1. Churn Data
2. Rev Cogs
3. Expansion Data

I. **Churn Hypothesis -5%**

Root Causes Addressed:

- In 2025 146 accounts churned due to users having difficulty using Method, while not specific to Multi Entity we know there are still problems and opportunities related to a smaller segment of larger customers.
  - "Outgrow Us" Part of large account churn we see.
  - "Workaround Churn" Large accounts leave when they can't manage multiple entities.

How improving the Multi Entity Helps:

- Multi-entity prevents customers from outgrowing Method.
- Multi-entity solves the scaling problem and prevents churn.

J. **New Conversions Hypothesis +1.66%**

Root Causes Addressed:

- "Multi-Entity" is not a trial consideration. No data available.

How improving the Multi Entity Helps:

- Inventory management features attract Manufacturing trials.
- Inventory features make Method more complete for Manufacturing.

Investment 7 - Recommendation Add this into Core User Journey and ONLY solve for Horizontal Use Cases.

Mobile App — eliminate the #1 competitive gap holding back our fastest-growing, highest-value verticals.

Overview

Metric	2025 Baseline	2026 Target Improvement	Rational
Churn	13 Accounts	4 (30%↓) Accounts	Targeting 2 sub root causes reported by churning customers.
Conversion (May - Sept)	16.04%	4 (0.16%↑) Accounts	We lack trial data on users seeking Mobile features. We do believe this will positively impact conversion if we are able to close critical gaps.
Downgrade	Not Applicable	Not Applicable	We expect this to have a positive impact but insufficient data to model.
Upgrade	$23,238	Not Applicable	We expect this to have a positive impact but insufficient data to model.

K. **Churn Hypothesis -30%**

Root Causes Addressed:

- In 2025 13 accounts churned due to users moving to a specific vertical product or due to lack of mobile features.
    - “Field Services Churn” we see a 35% churn rate for this group.
    - “Construction Churn” Additionally we see a 39% churn rate for this next high velocity vertical.
    - “Competitive Gap” Data is part of the "Better Alternative Found" category.
    - “Workflow Limitations” Cited by 603 accounts that say need mobile.

How improving the Mobile Helps:

- Mobile enables field teams to use Method on-site = reduces churn.
- Mobile enables job site workflows across various industries which could lead into next vertical prioritization.

L. **New Conversions Hypothesis +0.16%**

Root Causes Addressed:

- “Competitive Gap” Seen in part during trial abandonment reasons.
- “Missing Features” Seen in part during trial abandonment reasons.
- “Field Services/Construction” Trials data cited lack of mobile features.

How improving Mobile Helps:

- Striving for minimal viable products in Mobile for users.
- Addressing the largest gaps will enable us to defend and reduce major churn reasons.
- Mobile enables field workflows which could be the followup vertical to prioritize.
